Profile

Frontend Engineer with 3+ years of experience building high-performance, accessible, and scalable enterprise web applications using React.js, Next.js, and TypeScript. Specialized in Core Web Vitals optimization (LCP, CLS, INP), building reusable component design systems, and architecting complex client-side state. Experienced in SSR/SSG/ISR rendering paradigms, RESTful API integration, and test-driven development using Jest and React Testing Library.

Skills

- Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, Sass
- Frontend Frameworks & Libraries: React.js, Next.js (App & Pages Router), React Router, Tailwind CSS, Material-UI (MUI), Framer Motion, GSAP, HTML5 Canvas API
- State Management & Data Fetching: React Query (TanStack Query), Redux Toolkit, Context API, REST APIs, WebSockets / Socket.io
- Testing & Performance: Jest, React Testing Library (RTL), Core Web Vitals (LCP, CLS, INP), Lighthouse, Route-based Code Splitting, Dynamic Imports, Lazy Loading
- Architecture & Standards: Responsive Web Design, Design Systems, SSR / SSG / ISR, WCAG Accessibility (a11y), Asynchronous Programming, Git, Docker

Professional Experience

Software Engineer (Full-Stack Development)

08/2022 – Present | Gurgaon,India

Carelon Global Solution

- Architected and maintained a **design system** of **reusable, accessible UI components** using **TypeScript**, **Tailwind CSS**, and **Material-UI (MUI)**, cutting cross-team feature delivery cycles by **25%**.
- Optimized **frontend performance** and **Core Web Vitals**, reducing **Largest Contentful Paint (LCP)** by **35%** and initial bundle size by **40%** via **route-level code splitting**, **lazy loading**, and **Next.js SSR/ISR**.
- Streamlined **data synchronization** and **server-state caching** by integrating **RESTful APIs** using **React Query** and **Redux Toolkit**, eliminating redundant network calls by **45%**.
- Implemented comprehensive **unit and component integration tests** with **Jest** and **React Testing Library (RTL)**, raising critical workflow test coverage to **85%**.
- Collaborated with cross-functional **Agile/Scrum** teams and **UI/UX designers** to translate **Figma** prototypes into pixel-perfect, **WCAG-compliant (a11y)** web interfaces.

Projects

Comment.io – AI Feedback Analytics Platform 🌐

- Built a responsive analytics dashboard using **Next.js (App Router)**, **TypeScript**, and **Tailwind CSS** to visualize AI-driven sentiment analysis and feedback metrics integrated with the **Google Gemini API**.
- Implemented client-side state synchronization, server-state caching, and **optimistic UI updates** with **React Query (TanStack Query)**, reducing network payload overhead and latency.
- Engineered secure user session handling and role-based UI views using **NextAuth.js**, integrating the **Razorpay SDK** for subscription checkout workflows.
- **Tech Stack:** TypeScript, Next.js, React.js, React Query, Tailwind CSS, NextAuth.js, Razorpay Integration, Google Gemini API

Ikoo 🌐

- Engineered an interactive vector graphics canvas using the **HTML5 Canvas API** and **TypeScript**, sustaining smooth **60 FPS rendering** through event-driven drawing algorithms and optimized redraw cycles.
- Architected real-time client state synchronization using **WebSockets (Socket.io)**, enabling low-latency multi-user cursor tracking, object manipulation, and simultaneous canvas modifications.
- Designed modular UI toolbars, drag-and-drop transformation handlers, and shape-resizing controllers using **Tailwind CSS** and **custom React hooks**.
- **Tech Stack:** TypeScript, React.js, Next.js, HTML5 Canvas API, WebSockets, Socket.io, Tailwind CSS, NextAuth.js

Education

B.Tech (C.S.E)

08/2018 – 08/2022 | Gurdaspur,India

Beant College Of Engineering and Technology

CGPA 7.81/ 10
